

LAYER	L1 Family re-estimation COMPLETE	L2 ASIMOV test COMPLETE · INVERSE	L3 Content audit COMPLETE	L4 Controlled pilot PILOT SUPPORT	L5 Standards review PARTIAL · ACCESS LIMIT
QUESTION	Does priority survive family / year changes?	Does exposure support a technology-safety link?	What mechanisms do T22 and T25 disclose?	Can mismatch propagate with local contracts met?	Do mechanisms map to independent standards?
TEST	Family normalization and censoring at 2024	Frozen exposure and coefficient reproduction	Blinded single-reviewer audit: 49 vs 38 families	Preregistered 1-D model Mismatch + rescue tests	Blinded dual-rater coding of 18 frozen clause pairs
FINDING	4,729 families to 2024 Primary HIGH: T7, T25, T40	Inverse pooled direction Topic-level link: n.s.	T22 enriched for force-aware HRI safety	518 ordered propagations Rescue 0/1,500 propagated	6/18 pairs rated 12 pairs: INSUFFICIENT
